

Senior Front-End Developer (m/f/d), Vienna, Austria

Apply now

Founded in 2012, **wikifolio.com** is a dynamic and rapidly growing FinTech in Vienna and the best-known company for B2C investments in German-speaking countries.

We believe that everybody should be able to invest successfully in the capital markets – regardless of whether you have €100 or €100,000 to invest. We stand for the democratisation of the investment market and put our users at the centre of our focus.

Build high-performance web applications, work with real-time financial data, and shape the user experience of modern investing – join us as a Senior Front-End Developer.

Responsibilities

- › Develop, maintain, and optimize modern web applications using JavaScript (ES6+), HTML, and CSS.
- › Build scalable, reusable, and maintainable UI components and front-end architectures.
- › Design responsive, accessible, and high-performance user interfaces.
- › Write clean, modular, and well-documented code following best practices and coding standards.
- › Conduct thorough code reviews and provide constructive feedback to ensure high code quality and performance.
- › Collaborate closely with designers, backend engineers, and product stakeholders to translate business requirements into robust UI solutions.
- › Contribute to the full software development lifecycle (SDLC), from requirements and design through deployment and monitoring.
- › Implement unit, integration, and end-to-end tests.
- › Identify and resolve performance bottlenecks (e.g., rendering, bundle size, network issues).
- › Optimize applications for speed and scalability (e.g., lazy loading, code splitting).
- › Stay up to date with evolving front-end technologies, frameworks, and browser APIs.
- › Advocate for best practices in UX, performance, and maintainability.

Requirements

- › Strong JavaScript expertise, including a deep understanding of:
 - › JavaScript fundamentals
 - › ES6+ features (closures, promises, async/await, modules)
 - › Prototypal inheritance
 - › Functional programming concepts
- › Deep understanding of browser internals, including:

- › Event loop, call stack, task queue, microtasks
- › Rendering pipeline (reflow, repaint, compositing)
- › Strong knowledge of HTML5 and semantic markup
- › Advanced understanding of CSS, including:
 - › Cascading and specificity
 - › Layout systems (Flexbox, Grid)
 - › Responsive design
 - › Animations and transitions
- › Production experience with React 17+/18, including hooks, context, composition patterns, error boundaries, and performance optimization (memoization, lazy loading, code splitting)
- › Understanding of both server state (e.g., React Query, SWR) and client state (e.g., Valtio, Zustand, Redux)
- › Experience integrating REST APIs
- › Strong understanding of web performance optimization techniques
- › Experience with CI/CD pipelines, including Docker builds, branch-based deployment strategies, and environment variable management across environments (dev/staging/prod)
- › Experience with testing frameworks (e.g., Jest, Vitest, Cypress, Playwright)
- › Proficiency with CSS-in-JS solutions (e.g., Emotion, Styled Components), including theming, dynamic styles, and SSR style injection
- › Strong problem-solving skills and attention to detail
- › Fluency in English (written and spoken), along with excellent communication skills and the ability to collaborate effectively in international teams

Nice to Have

- › Experience with TypeScript and strong typing patterns
- › Familiarity with SSR/SSG frameworks (e.g., Next.js, Nuxt)
- › Experience with design systems and component libraries
- › Knowledge of Progressive Web Apps (PWAs)
- › Familiarity with Azure (especially Front Door and storage for static assets)
- › Basic understanding of backend concepts (APIs, authentication flows, microservices)
- › Experience with monitoring tools (e.g., Dynatrace)
