

Senior Mobile App Developer (m/f/d) Vienna, Austria

[Apply now](#)

Founded in 2012, **wikifolio.com** is a dynamic and rapidly growing FinTech in Vienna and the best-known company for B2C investments in German-speaking countries.

We believe that everybody should be able to invest successfully in the capital markets – regardless of whether you have €100 or €100,000 to invest. We stand for the democratisation of the investment market and put our users at the centre of our focus.

As our **Senior Software Engineer - Mobile**, you'll take the lead in driving the development, optimization, and expansion of our mobile applications, including "wikifolio," built with React Native. You'll work closely with our tech lead and cross-functional teams to ensure we're building solutions that truly address customer needs - solutions that are secure, extensible, and ready to scale. As a guardian of the technical maturity in your domain, you'll have a clear view of architectural challenges and shape how we tackle them over time.

Responsibilities

- Architect and implement mobile application features for iOS and Android according to the design provided by the design team.
- Develop and maintain a high-performance, scalable mobile application using React Native.
- Conduct comprehensive performance optimization and stability improvements.
- Implement robust testing strategies.
- Improve continuous integration/continuous deployment (CI/CD) processes with Fastlane & Azure DevOps.
- Review code, provide technical guidance, and maintain high-quality coding standards.
- Identify and resolve performance bottlenecks and technical debt.
- Provide technical guidance and mentorship within the mobile team, contributing to the development of high-quality mobile applications.
- Collaborate closely with PM, Design, and Backend teams within an agile organisation, ensuring thorough discussion and alignment of product requirements with stakeholders and cross-functional teams.
- Stay updated with the latest mobile development trends and React Native best practices.

Requirements

- 3+ years of professional mobile application development experience.
- 3+ years of experience with React Native.
- Proficiency in JavaScript and TypeScript.
- Proven experience in developing and maintaining cross-platform mobile applications.
- Strong understanding of iOS and Android platform-specific considerations.

- › Experience with state management strategies and frameworks.
- › Experience with mobile app performance optimization techniques.
- › Experience with mobile app testing frameworks like React native testing library, and Maestro.
- › Understanding of RESTful API integration.
- › Proficiency with Git and version control workflows.
- › Experience with continuous integration and deployment pipelines using Fastlane.
- › Strong verbal and written communication skills in English.
- › An interest in the financial markets is required.

It's a plus if you have

- › Knowledge of performance profiling tools like React Dev Tools.
- › Understanding of mobile security best practices.
- › End-to-end testing in Mobile applications.

Technical challenges you will work on

- › Improving app performance and reducing load times.
- › Implementing complex features with a modern user experience.
- › Maintaining consistent functionality across iOS and Android platforms.
- › Maintaining high test coverage.
- › Implementing robust error handling and logging.
